122M

Patients have cardiovascular disease in the US¹

60%

Also suffer from sleep apnea²

80%

Remain undiagnosed³

Sleep apnea is a major comorbidity of CVD and a significant risk factor for AFib, stroke, CHF and hypertension⁴.

Sleep apnea puts an enormous strain on the heart and remodels the cardiac substrate through stretching, oxidative stress and frequent sympathetic surges⁵.

Sleep apnea management may improve CVD treatment outcomes

Itamar Medical, together with its ecosystem partners, presents a completely remote, seamless and automated care pathway for sleep apnea diagnosis and treatment to improve patient outcomes.

With the **WatchPAT TurnKey program**, we ensure cardiovascular patients are diagnosed and start treatment for sleep apnea in **14 business days***. **It is as simple as a click of a button, and 100% hassle-free.**

SHORT TURNAROUND TIME

Screening to therapy in 14 business days*

NO FINANCIAL BURDEN

No additional cost to the referring physician,
No dealing with reimbursement, pre-authorization or billing

MINIMAL TIME & EFFORT FOR THE CLINIC

Clinic only screens the patients and orders the test

LONG TERM ADHERENCE

Ensure best-in-class outcomes along with detailed reporting back to the referring cardiologist

*On average

WatchPAT™ TurnKey

SCREENING - Using a short questionnaire to determine patient's risk for sleep apnea

PRESCRIBING HOME SLEEP APNEA TEST - Using a cloud-based platform or via fax

DIAGNOSING - Diagnosis is obtained with an easy to use home sleep test, delivered directly to the patient's home

TEST RESULTS & RECOMMENDATIONS - Test results are securely uploaded to the cloud for study interpretation and treatment recommendation by a board-certified sleep physician

TREATMENT - For patients who are eligible, therapy prescription is generated and all therapy equipment is shipped to their home

TREATMENT EFFECTIVENESS & COMPLIANCE - Patients are supported to ensure best-in-class outcomes along with detailed reporting back to the referring physician
