A new APProach to upgrade the HSAT experience

The WatchPAT® with SleePATh® app can help increase clinical efficiency and simplify the patient journey.

An app that manages data in a snap

Because sleep study metrics and patient self-reports should always be easy to manage and easy to view—all in one patient report.

WatchPAT® with SleePATh® features customizable in-app questionnaires to help you quickly, easily, and efficiently centralize data management and streamline the diagnostic process.

Streamlining your process can help provide a more accurate diagnosis, recover time for you and your staff, and help make better use of your staff resources.

What does customizable mean?
Turn off or on questions to match the needs of your clinic or adapt the questionnaire to the individual needs of your patient. It’s your choice.

For you
Facilitates questionnaire responses, broader sleep evaluation, and WatchPAT® study results in a single report.

For your staff
Saves time with pre-authorizations and eliminates paper-based questionnaires, redundancy, and time-consuming data entry.

For your patients
Provides at-home convenience, with no paperwork to lose or forget.
An app that helps fill in the gaps

Because digital documentation can be centralized with patient data. WatchPAT® with SleepPATH® makes it easy to gather the information you need for an accurate diagnosis.

In-app questionnaires

**Support sleep telemedicine**
Capture recommended Adult Comprehensive Sleep Evaluation

**Look further than AHI**
Evaluate insomnia, daytime sleepiness, sleep scheduling, RLS and patient behavior and lifestyle

**Improve communication**
Personalize the experience and provide reminders for completing the evaluation

Patient at a glance

A single integrated report with the information you need.

“Bedtime and morning questions are great—saving time on follow-ups and guaranteeing questionnaires completion. Traditionally, we hope and pray that patients answer questionnaires. We are also very happy with the report output—provides all the convenience and immediacy needed.”

Tara Duane—Home Sleep Testing Coordinator, Ohio Sleep Medicine
